iCat – Making the iCat work for you
[iCat one day course]
8:00 am – 5:00 pm

This course has been designed for individuals that own and have mastered the basic operation of an iCAT cone beam CT unit. The course is a “hands-on” course designed to show you how to customize the iCAT operations and make it work for you in your practice.

Introduction to the day

- Determine goals of participants
 - Expectations from the iCAT course
 - Goals for the imaging enterprise portion of the participants practice
- Explain goals of the I-CAT course

Cone Beam CT (CBCT)

- Explanation of the CBCT technology
- Anatomy of the I-CAT
- Patient risk / benefit when using CBCT
- How CBCT is different from conventional CT and other technology
- I-CAT capabilities - what it can do and what it can't do

Imaging Strategies

- Determine Case Specific Imaging goals
- Design imaging protocol to meet the imaging goals
- How does the referring doctor use the imaging information
- Set standards

I-CAT Operation to optimize image quality

1.) Image Acquisition

- Machine Calibration
- Patient positioning
- Head stabilization
- Resolution options
- Collimation
- Dose optimization

2.) Software

- Reporting Template Design
- Deliverables (Image output to referring doctors)

Oversight

- Setting standards
- Meeting standards
- Maintaining standards
- Image review for pathology/ risk management

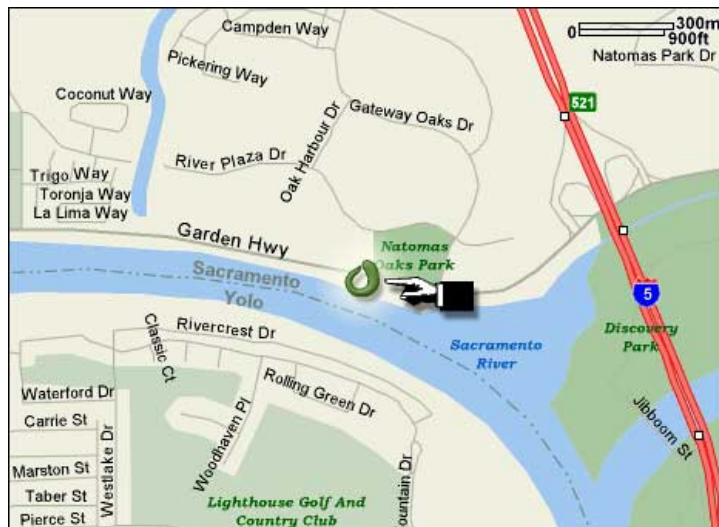

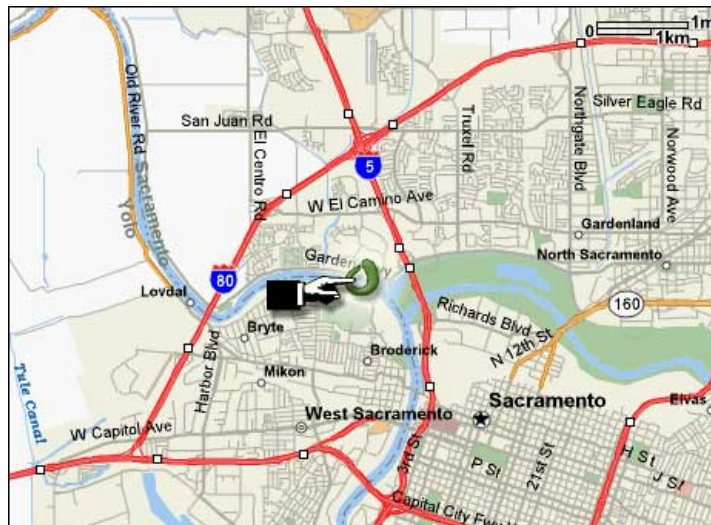

Case Work-up

- Hands-on-case work-ups
 - Implant case
 - TMJ/ facial pain case
 - Airway case
 - Impaction/ localization case

*Fee: **\$1,000.00 per person**. Full payment is due 10 business days prior to class date.
CALL FOR DISCOUNTED PRICING – FOR MORE THEN ONE ATTENDING PER OFFICE.*

**Note: Coffee and pastries will be provided in the morning and during break times. ddi will provide lunch.*
